1.0 PROGRAM ACTIVITIES *(Provide a complete description of the program. Include whether sites selected for the program may require a zone change, special use permit or subdivision approval and the number of units to be provided. Also determine any site disturbance will occur, including digging utility trenches and installing or improving wells or septic systems).*

The funds will be used to bring homes up to NYS Building Code, federal Housing Quality Standards (HQS) and to meet all other applicable state and local codes; funds will also be available to make modifications necessary for accessibility and mobility. Furthermore, special emphasis will be placed on making homes more energy efficient, and addressing Lead-based paint hazards.

The program will provide funds for the rehabilitation of twenty (20) owner-occupied housing

units. Sixteen (16) of the target buildings will be single family homes, and the remaining four (4) will be two family homes. There will be no mixed-use or mixed-income buildings assisted by the program; all buildings will be single family or two family homes.

The rehabilitation work under the program may require site disturbance in order to bring homes up to NYS Building Code, federal Housing Quality Standards (HQS) or to meet other applicable state and local codes.

Historic Properties:

For all projects that involve rehabilitation of buildings 50 years or older or ground disturbance, a Historic Resource Inventory Form must be completed and submitted to the State Historic Preservation Office (SHPO) for an effect determination.

For all projects that involve ground disturbance, evidence that a review was requested from the Tribal Historic Preservation Officer (THPO) will be submitted with the Tier 2 checklist. The

request for review must be made with adequate lead time as a 30-day response time is required.

#### Coastal Zone Management:

The target area contains NYS Coastal Zones according to the NYS Coastal Zone Atlas at <http://www.dos.ny.gov/opd/atlas/> (attached). Each project site will be checked for its location with regard to a Coastal Zone. If a site is within a Coastal Zone, the sponsor must contact EAU and EAU will need to coordinate a submission of the project to New York State Department of State (DOS) prior to completion of the Tier 2 checklist for that site.

#### Noise Abatement and Control:

The HUD Noise requirements at 24 CFR Part 51 must be complied with for all substantial rehabilitation projects. For each site the Sponsor must submit either a statement that the project constitutes moderate rehabilitation or the necessary noise assessment documents. To demonstrate moderate rehabilitation, the Sponsor will review the scope of work and value of the home using the Flood Management Worksheet in Appendix J of the HOME LPA Manual and attach it to each Tier 2.

Or, if the project is substantial rehabilitation, the sponsor must demonstrate that the project falls within the acceptable noise guidelines as described in the HOME LPA Manual. All sites must be assessed for their location with regard to major four-lane highways within 1,000 feet, active railroad lines within 3,000 feet and major commercial or military airports within 15 miles and provide the required information on the relevant noise worksheet if a noise source is located within one of those limiting distances. The noise worksheets will be submitted to EAU for further assessment. If the noise level is determined to be over 65dB, noise mitigation will be required and if the noise level is over 75 dB the site will normally not be acceptable for HOME funding.

#### HUD Environmental Standards:

Each site will be reviewed by an environmental professional, including a site visit, to determine that the site is not located on or near any hazardous materials or contamination. The site visit report will include a signed certification statement, that: "I, (Name, Title), certify that I am a qualified environmental professional as per ASTM 1527."

#### Environmental Justice:

According to NYSDEC mapping at: <http://www.dec.ny.gov/public/899.html>, the target area does include potential environmental justice areas. The program is intended to serve an existing need for affordable housing and is not expected to facilitate development which would result in adverse environmental justice impacts. All substantial rehabilitation projects will be reviewed to determine whether they are within an acceptable noise level area. If applicable, there will not be unmitigated thermal explosive hazards in close proximity to the sites. Each site will be reviewed for compliance with HUD Environmental Standards.

#### Asbestos & Lead-Based Paint:

Regarding asbestos containing materials (ACM), all project work will comply with NYS Department of Labor Part 56 requirements including the need for surveys and clearance reports,

as required. A contractor will be involved in the project construction and will be instructed regarding the need for compliance with Part 56.

Regarding lead-based paint (LBP), in homes constructed prior to 1978, all work will be conducted according to the HUD
